

NATIONAL HIV/AIDS AND AGING AWARENESS DAY

THE AIDS INSTITUTE

SEPTEMBER 18TH

A national campaign highlighting the complex issues related to HIV prevention, care, and treatment for aging populations in the United States

GOALS

- Increase the quality of life for people living with HIV
- Reduce stigma surrounding HIV among the aging population

DID YOU KNOW?

In 2016, the Centers for Disease Control and Prevention (CDC) reported persons aged 50 and older accounted for approximately

47%

of persons living with HIV

1 in 6 new diagnoses in the U.S. were in people aged 50 and older
